Limiting to Randomized Controlled Trials (RCTs)

Randomized Controlled Trials are excellent IMRAD format articles. In an RCT, the authors report on an evidence-based experiment they performed.

After you execute your search, PubMed will offer several filters with which to limit your results.

Limit to Randomized Controlled Trials

1. Randomized Controlled Trial is an article type, but it may not display automatically under that filter. See the handout on Adding New Filter Options to see how to add RCTs to the list of choices.

2. Click on Randomized Controlled Trial under Article types to limit your search results to only RCTs.
